

SÜKA Eire is managed by Mahon Ronan Electrical Ltd. They offer a range of slimline, modular **electric heaters** that are highly economical and energy-**efficient** with promise to deliver real money savings on energy bills. The heaters can be DIY installed and need no maintenance. They are low running cost heaters that you simply 'plug' in and warm up to enjoy elegant and healthy, thermostatically controlled heat at the flick of a switch.

### Eire's premier heaters with low impact on environment

You deserve a warm comfy home or workplace. Everyone does. But what frightens people off? Cost of running heaters. Now, with Suka, you can make your home, hotel (or workplace) warmer, healthier and more environmentally friendly. And that needn't be costly. You can reduce your carbon footprint with SÜKA electric heaters and save money as well as protect your family and the environment. SÜKA heaters cut CO2 emissions in two ways; **they use less energy** because of their efficiency, and **they produce no CO2 at the point of use**. You can also opt for 'Green Electricity' such as solar pv from us and benefit from government rebates. In UK, there is feed-in-tariff. Ireland needs that too.
